

Abstract for the 10th INSME Annual Meeting Round Table 1

**“Boosting Innovative Regional Ecosystems:
solving challenges and unleashing entrepreneurship through the Globe Innovation Platform (GIP)”**

Mr. Andrea Di Anselmo
Director
META Group
Italy

The workshop will present how META Group works alongside governments to advance innovation in regional and urban ecosystems.

GIP highlights are introduced: defining actual challenges through smart strategy approach, creating and animating a market place where key stakeholders (entrepreneurs, policy makers and investors) meet to solve them, while providing the needed capacity building to ensure real impact.

Case studies will show how we work with angel investors when investing in knowledge intensive companies, define challenges with stakeholders and animate the market place to find best solutions, develop talent and entrepreneurship in young people through creativity camps.
